

INTRODUCING THE... 5 STATION ID STAMP

The 5-Station ID Stamp can be used to mark components using your Trumpf-Style 5-Station Multi-Tool.

The tool uses a set of 5 special stamping punches. The standard font size is 10mm and the tool is designed for use in materials up to 8mm thick.

When used collectively, together, as a group or combined they will create the letters A - Z, numbers 0 - 9 and symbols % \$ / \ < > = +

Note: This tool requires special software and is compatible with ToPs 300 (V 4.12) and other major CAD/CAM software. Please contact your software supplier for more information

The 5 Station ID Stamps are all manufactured from **Ultima Tool Steel** boosting the resistance for demanding applications that require long term wear and toughness.

The Ultima steel improves the tool life when punching abrasive materials with high tensile strength.

Examples of use of this application are:

- Part Identification
- Company Names
- Logos
- Signs

Description (Punch, Die & Stripper)	Size	Cat. No.
10mm Character Height	10mm	26371
4mm Character Height	4mm	26373
