

Prevent sheet marking with brushed dies from Wilson Tool

A BETTER FINISH...

...EVERY TIME

◆ **Improved finish**

The Brushes are designed to allow the material to ride smoothly over the die and ensure that marking is kept to an absolute minimum.

◆ **Practical**

Brushes are made of hard wearing nylon and can be shimmed as they wear. When they eventually wear out they are quick and easy to replace.

◆ **Less waste**

Costly slug pulling is significantly reduced because you can run your machine with the vacuum on, even when punching extremely thin materials.

◆ **Versatile**

Most types of die including multi-tools, are available with brush inserts for machines that use Trumpf® style tools.

1. 4 Station Multi-tool	Part #25930	6. 0 - 40 2-4-1 die	Part #26028
2. 5 Station Multi-tool	Part #26026	7. Standard die (max. 56mm 'A' dim.)	Part #26025**/**
3. 6 Station Multi-tool	Part #25931	8. Standard die (for slitting - max.10mm wide)	Part #26037**
4. 10 Station Multi-tool	Part #26027	9. 56mm Parting die	Part #26040
