

INTRODUCING . . .
WILSON **2.4.1™**
PUNCHES

TWICE THE LIFE
TWICE THE VALUE

INTRODUCING . . .

WILSON 2.4.1™ PUNCHES

WILSON 2.4.1 is no longer a series of numbers. It now represents an exciting new concept in tooling. For owners of Trumpf®, Pullmax, Boschert, Euromac and Omes punch presses, the terms 'value' and 'tool life' are about to take on a whole new meaning.

The new **WILSON 2.4.1** Series Punches feature a unique design that incorporates a high precision spacer. This feature increases grind life to an unprecedented 6mm! That represents twice the amount of grind life that was previously available. And there's more! Other value added features that are standard with **WILSON 2.4.1** Series Punches include:

- **Built-in collar**

Punches can be loaded directly into the machine eliminating the time consuming process of pre-setting the tool in a fixture.

- **Reduced scrap**

The angular position of the punch is fixed thus eliminating the possibility of a setting error

- **Increased reliability**

There is no chance of high usage punches moving in the collar while under a heavy load

- **High quality steel**

All Wilson punches and dies are made of High Speed Steel, providing you with more hits between tool sharpening and reduce down time

- **Optima coating**

All punches are available with our Optima coating for maximum tool life and increased resistance to galling

- **Fast delivery**

We maintain the largest inventory of tooling in the world making it possible for us to get your tools to you fast!

WILSON 2.4.1 - it's like getting two tools for the price of one. And it's available only from Wilson Tool International®. So the next time you need to order tooling for your punch press, insist on **WILSON 2.4.1** Punches from Wilson Tool International®. After all, it's not often that you get two of anything for the price of one.

For more information on the new **WILSON 2.4.1** Punches, please contact your local Wilson Tool representative or our Sales Desk on Free phone 0800 373748, Free fax 0800 373758 or Ireland Free phone 1-800 709009 and Free fax 1-800 535538.
