Shear Chuck for Thick Turret Punches	55287	
Shear Chuck Adapter for Trumpf Style Punches	55288	
Shear Chuck Adapter for HP Style Punches	55289	

Features

Excellent Grind Quality

With the same CBN grinding wheel and grinding motor as the X-Sharp grinder, your punches and dies are sharpened with a first-rate surface finish.

Manual Grinding Process

The X-Sharp cmg uses a simple manual grinding process to sharpen tools. A digital read-out ensures the correct amount of material is removed.

Shear Grinding

Punches with shears can also be sharpened using the X-Sharp cmg Shear Grinding Chuck.

Coolant

The X-Sharp cmg is equipped with a powerful closed coolant system, ensuring the tool is constantly flooded with coolant during the grinding process. This prevents burning and surface cracking, improving the quality of the grind and helping to maximize your tool life by giving you a factory sharp edge every time.
